Imagine What You Can Do Here.....

Company Profile:

IPG Photonics manufactures high-performance fiber lasers and amplifiers for use in a wide range of markets, such as materials processing, advanced technologies, aerospace and medical applications.

IPG Photonics pioneered the development and commercialization of optical fiber-based lasers, which are a new generation of lasers that combine the advantages of semiconductor diodes with the high amplification and precise beam qualities of specialty optical fibers.

IPG Photonics is based in Oxford, Massachusetts with additional manufacturing facilities in Germany, Italy and Russia, and regional sales offices in Detroit, Silicon Valley, China, France, India, Japan, Korea, Singapore and the U.K.

Career Opportunities:

- **Scientists**
  - Ph.D. in Science and/or Engineering
  - Experience with:
    - Laser research and development
    - Optical and laser characterization
    - Advanced nonlinear optical systems

- **Laser Engineers**
  - BS in Science or Engineering, preferably with 5+ years of directly-related industry experience
  - Experience with lasers and optical components

- **Epitaxial Engineer**
  - PhD or MS in Materials Science, Physics or Electrical Engineering
  - 1 year direct epitaxial experience (MOCVD or MBE).
